ESPRECIOUS GO

Your brand with
Esprecious GO

The taste of quality worldwide

Convenience!

Coffee on the go is a growing demand from coffee lovers everywhere. Convenience store, petrol station, canteen, or waiting room, literally anywhere can benefit from a quality coffee solution.

Passing trade, established audience or impulse purchaser, coffee selections are the perfect product to generate revenue.

Striking solution with your branding

Designed with branding in mind. With large surface areas clear of doors and interruptions, your brand will catch the coffee lovers eye and draw them to you!

Inside, the Esprecious GO enables you to customise the drink icons, selection background as well as upload custom screensavers and even screensaver videos with sound.

Quality

Only quality materials have been used to ensure the Esprecious GO has a long service life. Important components can be changed (such as cup dispense size) and the panels can be branded more than once enabling the Esprecious GO to grow with your brand.

Every Esprecious GO unit is quality controlled and built by hand to ensure the optimum product.

The coffee engine inside

- Bean-to-cup: brewed with fresh coffee beans
- Fresh milk option: 7 litres stored at 4 degrees
- Instant milk option: Instant milk capacity 1.3 litres
- Easy, quick installation
- Very easy to operate with simple maintenance
- Intuitive touchscreen
- Menu with up to 30 choices
- Telemetry and payment system ready

The Esprecious 11L (Milk option)

Esprecious 11M has two canisters, one for coffee beans and one for instant ingredients. The Esprecious 11M is developed for fresh milk usage and can be directly installed with the FreshMilk unit. The integrated milk foamer prepares beverages such as cappuccino and latte with fresh milk. The large canister (over 3 litres) for instant ingredients can be filled with cocoa for other specialities such as mocha and hot chocolate.

The Esprecious 12 (Instant option)

Esprecious 12 has three canisters, one for coffee beans and two for instant ingredients (Milk and Chocolate). The Esprecious 12 is developed for instant milk usage removing the maintenance required for fresh milk. The two canisters (1.3 litres) for instant ingredients can be filled with milk and cocoa for other coffee specialities such as hot chocolate.

Esprecious GO

Coffee on the go is convenience - so is the Esprecious GO.

Available in instant milk and fresh milk, with or without payment system, with or without telemetry and most importantly with or without the need for a water supply at the installation location.

Press a button, make contactless payment and go - all in less than a minute.

Want coffee on the GO? Esprecious GO

- Backlit logo or image
LED lighting in a choice of colours
- Space for a full selection of condiments
- The simple to use intuitive touch screen is fully customisable and makes the user experience quick and simple. LED lighting can also be changed to your selected colour.
- Card and contactless payment, or closed payment system - perfect for member lounges or controlled vending.
- Full size branding panels.
- Storage space for water systems if a pump is required as well as waste container and additional consumables.

Esprecious GO Fresh Milk

Esprecious GO Instant Milk

Touch-screen

Look, press, coffee. It's that simple. We are a smartphone world so this full colour touch display is second nature. Intuitive and clear.

Fresh beans

No matter your milk choice great coffee comes straight from the bean. All Esprecious GO models use bean to cup technology.
